DON'T MISS THE OPPORTUNITY TO JOIN THE BlueBRIDGE WORKSHOP ON DATA MANAGEMENT SERVICES TO SUPPORT STOCK ASSESSMENT!

Wednesday 21 September, 2016
Sigma Room 09:00 – 13:00

If you are working on stock assessment models or you are a researcher or a scientist that needs computing capabilities, tools to harmonize different data sources, and facilities to easily share research results with your collaborators, you cannot miss this workshop!

You can find all the information on the workshop here: http://snurl.eu/1BjsX8
If you are interested in participating to the workshop please send an expression of interest to info@bluebridge-vres.eu

CAN'T YOU COME TO THE WORKSHOP?
We will be present for the full duration of the conference with an information booth in Hall 2 (in front of the two main session rooms, Omega 1 and Omega 2). Come to our booth; we will be happy to give you all the information you need on BlueBRIDGE, and demonstrate our services!
BlueBRIDGE is a project funded under the Horizon 2020 framework that develops tailor-made data management services to support the ecosystem approach to fisheries community. ICES is a partner of the BlueBRIDGE project and a user of its services.

In particular, ICES scientists have contributed to the development of the following BlueBRIDGE services:

- Stock assessment dashboard: a tool to facilitate the efficient assessment of fishery stocks and the production of related knowledge and indicators.

- Western horse mackerel Management Strategy Evaluation: a tool that implements a management strategy evaluation (MSE) that evaluates whether harvest control rules (HCRs) meet both conservation and stability objectives for the Western horse mackerel stock. The MSE VRE can be used to determine whether management plans can be considered precautionary for this stock.

- Ensemble Model: a tool aimed to implement an ensemble multispecies stock model structured by species and size. Foreseen use is to provide strategic context for stock management in multispecies and mixed fisheries.
